Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

New grounds of rejection

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 as presently amended and 2-5, and 7-20 as previously presented, are rejected under 35 U.S.C. 103(a) as being unpatentable over Teramoto et al. (US publication 2003/0059991) in combination with the applicant's admitted prior art (AAPA), Yamazaki (US publication 2004/0201874), Fujimura (US publication 2005/014119), Takaoka et al. (US patent 4,584,025), and Yamanaka (US publication 2003/0148565).

With respect to presently amended claim 1, and previously presented claims 2-5, and 7-20, Teramoto et al. in combination with Yamazaki, Fujimura, Takaoka et al., and Yamanaka teach the invention as claimed. See the contents of the rejection of the office action dated 07/12/05.

Further with respect to presently amended claim 1, Teramoto et al. appear to fail to teach that laser is an extended laser or a continuous wave laser.

AAPA teaches the use of extended laser to increase the length of crystal. See page 3, lines 8-15 of the Background of the Invention of this application.

It would have been obvious to one of ordinary skill in the art of making semiconductor devices to incorporate the teaching of AAPA into the method of Teramoto et al. to achieve the above benefit.

Conclusion
